

HOLLORAN VINEYARD WINES

Organic & Biodynamic Farming on  
Premium Willamette Valley  
Vineyard Sites

### **Winemaking:**

We practice traditional Burgundian winemaking, with small lot fermentations and minimal handling or processing. Our barrel-aged wines go through natural malolactic fermentation, and are typically bottled unfinned and unfiltered, to preserve their individual character and flavor. We like wines that are food friendly (ample acid), and for Pinot Noir we minimize extraction of tannin, as we believe the wines should be about the fruit. Mark LaGasse is our winemaker.

### **Brands/Labels**

*Holloran* - Wines of reserve quality that express attributes of their source vineyards or appellations are bottled under the Holloran label, frequently with a vineyard designation.

*Stafford Hill* – Excellent value wines that fall just short of reserve quality. Stafford Hill bottlings typically are made from declassified barrels or lots from the same sources that comprise the Holloran cuvees.

**Varietals produced:** Pinot Noir, Riesling, Tempranillo, Chardonnay

**Annual Production** - 5,000 – 6,000 cases

### **Our Vineyards**

#### **Le Pavillon Vineyard – Dundee Hills AVA - Dundee, OR:**

- *General viticulture* –organic farming since 1999, converted to biodynamic in 2006.
